

“As the deer searches for water, I thirst for Thee O Lord...” Bolfing Brothers Marble Inc. was founded in 1976. We chose these words from Psalm 42 to express an awareness of our deep need for Our Lord, God to be the central focus of our existence. We have been a part of the Greater Houston construction community for over three decades because good people working hard have focused on our stated mission. Since the 70’s Bolfing Brothers installed Cultured Marble tubs, vanities and showers in thousands of custom homes.

Now Granite and natural stone is the material homeowners and designers are choosing most often. The latest chapter of our company’s story has been written by the real estate market which demands stone and quartz countertops in elegant kitchens and luxurious spa bathrooms. Over the last 5 years, investments were made not only in state of the art stone cutting and polishing machinery but in education and retraining of faithful employees. Newer product lines satisfy the criteria for a “Green” environment. As a company, Bolfing Brothers feels the best use of God’s gift from the quarries is to make something beautiful and useful that will function in place for decades.

This is who we ARE: employees and department managers, many second generation, many with over 20 years of experience who take pride in their work. They care and follow-up. Previous customers refer their friends. Our database has second and third time home-owners. Company founder, Phil Bolfing, USMC, Viet Nam Veteran, proudly flies the Marine Corps flag. A bold “Semper Fi” is the greeting extended to fellow Marines. Veterans and visitors often stop in to share stories that cross generations and span the globe. Our community involvement extends to projects of the Constable and staff of Precinct 4. We are Pro-Life advocates whose business lunches inspire lively political discussions. Fall brings the hunting season. In Texas, we pass out the ‘camo’ hats and the points we count are not Weight-Watchers!

Tony Bolfing, son of Phil and Rose Anne, who joined the company full time in 2004 was the first child baptized into the Christ the Redeemer Catholic Community in 1980. The church’s current construction project is casting a grand shadow all the way to Highway 290. Tony married Kate Davis there in 2007. Besides working together, they are participating in the American Cancer Society’s Walk for Life Relay, May 16, 2008. Since a relay passes the responsibility of reaching the goal from one hand to another, this is an appropriate metaphor for our business at this time.

The goal is set, the tools are in place. Especially now in these troubled times we ask God to fill our country with people who will use His gifts of freedom and abundance to honor Him. We ask His blessings and His presence in our marriage, our family, our work, and in every transaction of our daily lives. Please visit www.bolfingbrothers.com
