

Layout the slabs:

What does it mean to **layout** my slabs?

Some natural stone materials display wildly unpredictable movement. In fact, one side of the slab may look entirely different in pattern or color from the opposite end of the same slab.

When you make selections at the Slab Yard, we encourage every homeowner to view ALL the slabs in a batch. Your contract allows you to “sign off” on the layout:

Homeowner to layout slabs

YES _____ NO _____

After you sign your contract and the slabs are delivered, we will call you. Of course there is NO MATCHING of patterns but to a certain extent we can move the template around to fit in a pleasing layout. We offer the opportunity to preview just how the countertop and trim pieces will land on a slab. **Slabs are all different sizes.** You want to use all the available material in the best configuration but you may want to **avoid a spot** or relocate a seam or sink cutout to **capture a unique or distinctive section**. We want you to be involved in the process.
