

Where do I begin?

I saw a color I like...

I have no idea what color I want...

I want to match my cabinet (paint, décor, etc.)...

I am on a strict budget but I want granite countertops...

My bathroom needs updating...

I want my designer to help me choose my countertop material and edges...

My neighbor is getting her kitchen redone and I'd like some information...

Going with "green" products is important to me...

We are adding an outdoor kitchen... **I don't know where to begin...**

The answer in each case is Bolfing Brothers Marble Inc. Showroom

We encourage customers to "try on" tubs for a good fit. It is important to explore the sizes and choices of tubs as well as to choose colors and materials for countertops from a wide array.

Then what do I do?

Bring your measurements and a sketch if you have specific areas which need new countertops or call the office to schedule a "measure". Bring fabric samples, paint chips, even a cabinet drawer to help you explore the possibilities. We will show you materials, colors, edges, price points ...all the choices you will need to make selections. Your next stop may be to visit a slab yard from our **Preferred Granite and Stone Suppliers** list or you may choose from our remnants for a small tabletop or powder room vanity. We can bid the tear out of existing materials. Of course we will field measure before fabricating. **You will receive a written bid.** Our **contract** covers the scope of work and details about the material you choose. We understand that even a small bathroom redo is a huge undertaking...

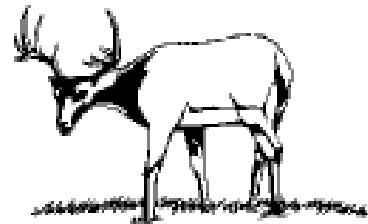

My Builder sent me here to make selections...

During new construction or remodeling your space, you are working with a custom builder or contractor who is quite familiar with the process from blueprint to final walk through. He is either relying on a designer to help guide you through the choices or you are trying to fill in the blank spaces of your "Selection sheet". We will make copies of your blueprint if you are in pre-construction. We may have already measured the job if cabinets are in. We will walk you through the array of choices for each space listening carefully to your concerns. You will look at colors, edges and materials. These will all be recorded for a **written bid to your contractor.**

EDGE: A margin of superiority; an advantage, as in

A slight edge over the opposition
